Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

Daytime highs will begin a slow decline statewide this weekend. Temperatures will drop both Saturday and Sunday but still remain a few to several degrees above normal for mid-September. Most of the week next week, however, will see near or below normal temperatures. A plume of moisture will continue to stream in from the south-southeast from remnants of Hurricane Linda off the Baja California coast. This will lead to a chance of rain and widely scattered thunderstorms across much of Southern California with the heaviest rain possible on the coastal slopes.

Exercise in Coastal Region:

Urban Shield/Yellow Command - Urban Shield will be taking place 09/11/15 - 09/14/15, attached below is a link to the event schedule. The event is kicking off and ending at Alameda County Fairgrounds 4501 Pleasanton Avenue, Pleasanton.

Event Schedule - <https://www.urbanshield.org/index.php/vendors/event-schedule>

NORTHERN CALIFORNIA

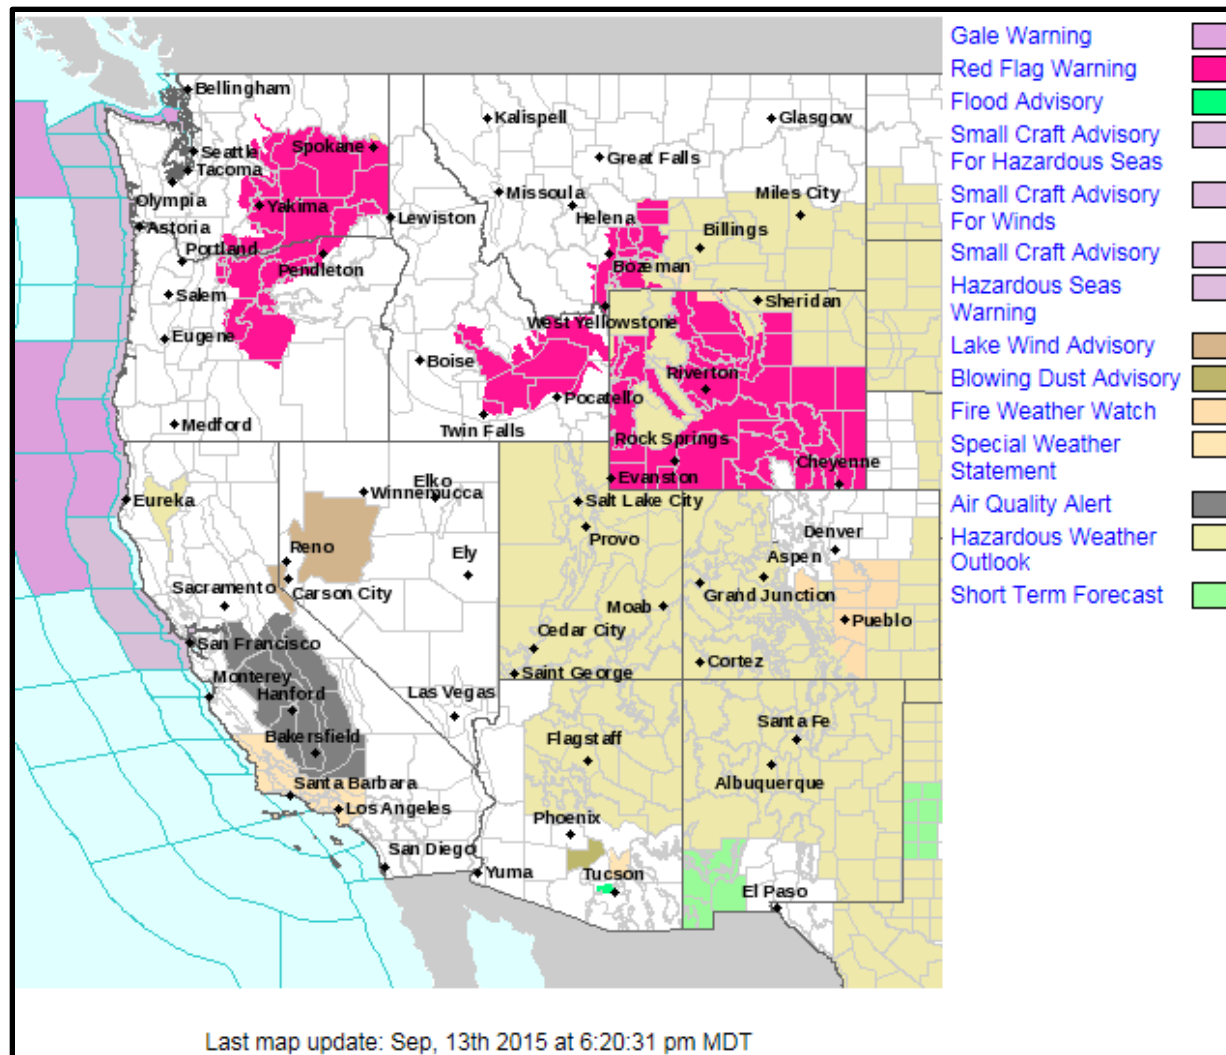

Moist unstable air aloft has moved over the northern California region and produced mostly cloudy skies. Dry air remains in place at the surface over a large part of the region and most of the precipitation out of the clouds is evaporating before reaching the ground. Showers and thunderstorms will likely increase over the region this afternoon, with more activity expected in eastern areas than in western areas. Any storm will be capable of producing 0.10-0.20 inches with a direct hit, but any lightning may still lead to new ignitions. Isolated showers and thunderstorms may continue in eastern areas overnight, and cover a larger area on Monday. Rainfall amounts will increase on Monday and new ignitions from lightning are not considered as large a threat. A cold front moving into the area from the northwest late on Monday will cause increasing southwest to west winds over the higher terrain through Monday night. Scattered showers and isolated thunderstorms are still possible with the frontal passage, with brief heavy rainfall possible mainly in eastern areas into early Tuesday. Breezy conditions will continue through Thursday, and another front will bring moderate rain to northwest California and light rain to the remainder of the region on Wednesday. A gradual warming and drying trend will begin on Thursday and continue throughout next weekend, with areas of light north to east or offshore surface winds from the lower western slopes to the coast.

SOUTHERN CALIFORNIA

A weak area of low pressure off the Central California coast will continue to spread varying amounts of clouds across the region today. High temperatures will continue to be above normal today and some warming will occur over yesterday in places where sunshine is more abundant. Daytime highs will be in the 90s across the inland valleys, with upper 70s to upper 80s in the mountains. There may be isolated wet thunderstorms over the Sierra today, but it should remain dry elsewhere across the region. A rather complex forecast is shaping up for the first part of the work week. Moisture from the remains of former Hurricane Linda will begin to interact with an approaching trough on Monday to bring an increase in showers to the region, mainly from Los Angeles County south and east. The chance for showers will continue Monday night and into Tuesday as the bulk of the moisture moves across the southern portions of the state. There remains much uncertainty regarding precipitation amounts, but currently we can expect less than a 1/4 inch across the coastal and valley areas with some isolated amounts approaching 1 inch in the mountains of San Diego County. Across Central California, isolated thunderstorms will be possible over the Sierra with a scattered light showers or drizzle along the central coast Monday through early Tuesday morning. Temperatures will be much cooler throughout the region and humidity levels will rise both Monday and Tuesday. As the trough approaches Monday and Tuesday, winds will begin to increase across the mountains and deserts, especially by Tuesday afternoon. The strongest winds will be in the 20-30 mph range across the Antelope Valley into the Mojave Desert, but the higher elevations of the Sierra as well as the Owens Valley will see stronger winds developing from the southwest and west. A trough will linger across the region for much of the week keeping temperatures at or slightly below normal through Friday. A few showers will be possible over Central California on Wednesday, but after that it will be dry across all of the area. Locally strong and gusty winds will continue across the desert and higher terrain on Wednesday, with winds diminishing and becoming more northwesterly Thursday and Friday. The marine layer will be deep enough to produce night and morning low clouds and fog throughout the coastal region starting tomorrow and continuing through most of the week. Warmer and drier weather is expected for next weekend accompanied by light offshore flow.

Access and Functional Needs/ Health and Medical

- American Legion Ambulance staffing 9 units (both Amador and Calaveras Counties). They have implemented emergency staffing through the incident. They will staff (9) 24 hour units through 09/11/15 and will staff 8 units 09/12 – 09/13/15.
- Per CDSS: Currently, there are 13 known community care licensing facilities impacted by the Butte Fire. The impact to these facilities has affected at least 132 clients. CDSS will continue to monitor the impact to these facilities as well as any other facilities that become impacted by the ongoing fires.
- Calaveras County: Avalon Health Care San Andreas (Skilled Nursing Facility): Update on 9/12/15 at 1201 hours from Region IV MHOAC (designee). Air quality remains good. Met with the site manager and the facility has no immediate needs. The facility transferred 12 at-risk patients yesterday leaving the current census of 71. Resources are available if evacuation is necessary. Site maintenance had procured 10 additional HEPA filters which should be on-site 9/12/15.
- Mark Twain Medical Center (MTMC): Update 9/12/15 1201 hours from Medical Health Operational Area Coordinator, Calaveras, Region IV. Transferring 7 patients to outlying facilities due to poor air quality within the facility. All transfers to be performed by American Legion with no assistance needed. There was an HVAC malfunction which allowed outside air to be circulated within the facility. Problem mitigated and new filters installed. Air quality has improved significantly over the 2 hours since the mitigation. After the transfer of these 7 patients, the MTMC census of Admitted patients will be 0 (zero). [Update 9/13/15 1131 hours, Mark Twain Hospital transferred their remaining 4 admitted patients and closed admissions. The patients were transferred to St. Josephs in Stockton. One patient remained due to special health care needs. Mark Twain Hospital will not admit any patients until air quality monitoring can be established. If the Hospital cannot obtain air monitoring equipment, EMSA will submit a resource request to the Region.](#)
- Amador County: Sutter Amador Hospital (General Acute Care Hospital): Update 9/11/15 2030 hours from MHOAC, (designee) Region IV Fire continues to impact the region with widespread growth affecting air quality. No issue or immediate need at the moment. Hospital environment safe and no complaints of increase in respiratory issues. Air quality inside the hospital is good. They are prepared for evacuation if needed and continue to maintain their census by acuity. All clinical units are open. Only emergency surgeries are being performed with 2 scheduled for Saturday. There is concern about staff and their families who have been evacuated. EAP services have been brought in for employees and their families. Hospital ICS continues to operate with regular updates. Expecting shipment of Albuterol tomorrow to pharmacy.
- [09/13/15 at 0800 hours, Calaveras County continues to perform welfare checks on known persons that have access and functional needs in the West Point and Railroad Flat areas.](#)

SITUATION SUMMARY

FIRES, NORTHERN OPERATIONS AREA

Butte, Vegetation Fire, Amador and Calaveras County

Infrastructure

- Per Cal EPA EF 10 Coordinator as of 1400, 09/11/15:
 - SWRCB Division of Drinking Water reached out to local engineers in Calaveras County and determined that the current water system issues were all power related. Portable power is being used to address the issues.
- Per CUEA at 0900 hours on 09/13/15, Butte Fire power outage at 5,300, major transmission and distribution rebuild underway.
 - No impact to PG&E Hydro Generation.
 - All five cell towers impacted presently on full portable generation.
 - East Bay Municipal Utilities District reporting no impact to their water system.
- Per Cal OES Public Safety Communications: The communications site Sierra Vista has burned over due to the Butte Fire. State agencies who are in that site are CALFIRE, Department of Transportation (DOT) and California Highway Patrol (CHP). A technician responded to the site to assess the damage.
 - Phone lines and power are down.
 - CALFIRE has a portable repeater being installed at the site. CALFIRE is operational.
 - CHP is using coverage of other sites. CHP is down because the repeater is phone line controlled.
 - DOT is operational.
- Per Cal OES Public Safety Communications: CAL-Fire TCU headquarters in San Andreas is currently being evacuated. PSC has a shop located within that facility. PSC technicians were evacuated out of the facility. A snowcat assigned to the facility was towed out and the test equipment was also removed by the technicians.
- Per the Cal OES Critical Infrastructure Protection (CIP) Division: There are seven CIP identified, state-level, critical infrastructure sites that meet the draft criteria and are within 10 miles of the fire – Amador County EOC, their Department of Public Health mail office, Calaveras County EOC, their Department of Public Health main office, the origin of the Mokelumne Aqueduct, the Pardee Dam and Reservoir, and the Jackson Creek Spillway and Dam. The buildings are vulnerable to fire but the two dams and aqueduct are generally less vulnerable to fire. Other infrastructure noted in the 10 mile radius are multiple PSC communications towers, 5 hydro power plants (99, 14, 4.5, 1.4, .23MW), multiple associated substations, multiple transmission lines (230, 115, 80, 60kV, +), and two natural gas lines (12 and 10 inch).

Health and Medical

Per Red Cross:

- Red Cross Integrated Care Team (ICT) has deployed to the Calistoga shelter. ICT is comprised of Disaster Mental Health, Disaster Health Services, Bulk Distribution, water and client assessment. These teams typically go house to house in communities.
- Shelter wrap-around services and supplies are sufficient at this time. Red Cross is continuously monitoring and evaluating to ensure communication occurs early if support needed.

Per EMSA:

- St. Helena Hospital Clearlake anticipates sending inter-facility transfers to Ukiah Valley Medical Center instead of St. Helena, and may gain some staff assistance from them as well.
- Heavy smoke has been observed, so air quality issues exist, but immediate rescue operations are the focus at present.
- Local fire and EMS resources are fully engaged; Cal FIRE has requested and been approved to bring 2 private ambulances in to support its operations under a vendor arrangement and as mutual aid.

Per CDPH:

- An Intermediate Care Facility/Developmentally Disabled (ICF-DD) in Kelseyville is on alert for potential evacuation (6 individuals affected) to a Lakeside facility.

Adults in Community Transitions,
4795 Gaddy Lane
Kelseyville, CA 95451

- St. Helena Hospital is reporting five (5) patients with smoke inhalation injuries. More than 100 Hospital staff lives in Middletown or Hidden Valley communities and may not be able to staff the Hospital. St. Helena Hospital is helping to support displaced staff.
- Per CDPH: there are no CDPH licensed healthcare facilities in the Hidden Valley Lake area. The nearest facility is Clearlake.

Access and Functional Needs

- CDSS is monitoring and FAST teams will be deployed if needs are identified. UPDATE: At 0134 hours on 09/13/15, CDSS advised it was established that the FAST will not be deployed at this time for the Calistoga Shelter. Confirmation was received from inside the shelter that there is currently no unmet needs of current shelter residents with disabilities or access and functional needs. State FAST Members and County FAST Coordinators are aware of the potential that they may need to deploy.

Infrastructure

- Per the State Water Resources Control Board, the Callayomi County Water District's (serving Middletown); office and treatment plant were on fire the evening of 09/12/15. The District believes the building, all records and treatment plant have been destroyed by the fire. The service area of Middletown is currently evacuated.
- The Cobb Area County Water District has one source out of five operational. Staff is waiting for clearance to assess the damage. The service area is currently evacuated.
- Per CUEA: Valley/Lake & Napa, 7,000 out of service with major local pole and cable damage. No impact to Gas system. PG&E has opened their corporate EOC in San Francisco to support these fires. 3 cell towers are off line due to the power situation, no access to them presently. Limited impact to cell service at this time.
- Per PSC: AT&T is reporting a remote isolation in Cobb Mountain, Lake County. The remote switch serves 1531 ATNs. AT&T is gathering further information and will send as available. The area is under mandatory evacuations due to the Valley Fire. Based on the information received, splicers are unable to access the area due to the fire and evacuations. Affected NPA-NXX is 707-928, serving PSAP is Lake County Sheriff. UPDATE: AT&T has confirmed that the area PSAPs are not affected and taking their calls. The isolation is affecting the community of Middletown, with all fiber and copper out of the Cobb Mountain Remote affected/damaged. AT&T crews are still on standby.
- Per the Cal OES Critical Infrastructure Protection (CIP) Division: There is no CIP-identified state-critical infrastructure within ten miles of the current fire area. There are ten PG&E geothermal power plants ranging in capacity from 22MW-120MW within one mile of the current burn area, as well as their associated substations and transmission lines. Additionally there are five Public Safety Communications (PSC) tower sites within one mile of the current burn area. This information is locational only.
